pekugara.com

Full stack developer and UI designer with hands-on experience designing and building web platforms and mobile applications from the ground up. Founder of Pekugara, a live student accommodation app on the App Store and Google Play, with a strong portfolio of client websites spanning e-commerce, nonprofit, and professional services. Skilled in React Native, Next.js, Supabase, responsive design, branding, design systems, and developer-ready handoff.

EXPERIENCE

Founder, CEO & Lead Product Designer

2024 – Present

Pekugara · Hamden, United States

- Designed and built the Pekugara mobile app, including all screens, user flows, branding, icon set, and design system, from concept to live release on the App Store and Google Play
- Created brand identity: logo, colour palette, typography system, and brand guidelines used consistently across the app, web, and marketing materials
- Designed onboarding flows, property listing cards, map interfaces, booking screens, and an AI assistant chat UI tailored for a student audience
- Built the app with React Native (Expo) and Supabase, including real-time chat, push notifications, and EcoCash payments

Freelance Web Designer & Developer

2022 – Present

Global Website Solutions · Remote

- Designed and built custom websites and business systems for clients across e-commerce, drilling services, nonprofit ministry, education, and digital agencies
- Produced wireframes, mockups, and final production designs for desktop and mobile, delivering responsive, accessible, and performance-optimised experiences
- Created logos, brand guides, and visual identities as part of end-to-end client projects
- Managed client communication, creative briefs, revision cycles, and final delivery with consistent on-time results
